PROFESSIONAL SUMMARY

Cybersecurity graduate from HITU (2026) with a broad technical foundation across cybersecurity, cloud (AWS), networking, and software development. NTI Cloud Architect and ITI networking trained, now completing NTI's 420-hour Hire Ready program (Red Hat Linux, VMware, Kubernetes, AWS). Led an 11-member team on a final-year security platform. Seeking a role in cybersecurity, cloud, or IT.

CORE SKILLS

- **Cloud & Infrastructure:** AWS (IAM, CloudFormation, Lambda, Elastic Beanstalk), Cloud Security, Infrastructure-as-Code.
- **Systems & Networking:** Linux, Windows; TCP/IP, OSI Model, Subnetting, Network Security.
- **Programming & Security:** Python; Nmap, Wireshark, Metasploit, Ethical Hacking; Reverse Engineering & Malware Analysis (self-study).
- **DevOps & Containers:** Docker, CI/CD, Caddy Reverse Proxy, One-Command Deployment.
- **In Training (NTI, expected Feb 2027):** Red Hat Linux administration (RHCSA track), VMware vSphere/ESXi, AWS Solutions Architect & Cloud Security (incl. VPC), Kubernetes, Red Hat OpenShift, Huawei Cloud migration.
- **Professional:** Team Leadership, Problem Solving, Analytical Thinking, Communication.

EXPERIENCE & TRAINING

NTI Hire Ready Program — Cloud, Virtualization & Systems Oct 2026 – Feb 2027 (expected)
National Telecommunication Institute (NTI) — Cairo, Egypt | In progress

- Enrolled in a 420-hour program (294-hour technical track + 126-hour career development) aimed at Cloud Engineer, Cloud Infrastructure, System Administrator, and Data Center Administration roles.
- Training in Red Hat Linux administration (RHCSA track), VMware vSphere/ESXi, AWS Solutions Architect and Cloud Security, Docker, Kubernetes, Red Hat OpenShift, and Huawei Cloud migration, with hands-on VM and remote labs.
- Career development in Business English, project management, and workplace skills, including a capstone project.

NTI Cloud Architect Trainee Aug 2025 – Oct 2025
National Telecommunication Institute (NTI) — Cairo, Egypt (Remote)

- Earned 87.5% in a 120-hour AWS Cloud Architect program, building least-privilege access controls with IAM and automating infrastructure with CloudFormation through hands-on labs.
- Deployed and hosted applications via Lambda and Elastic Beanstalk, applying cloud security best practices to networking and access configuration.

Computer Networking Training — Information Technology Institute (ITI), Cairo Apr 2023 – May 2023

- Completed intensive networking coursework (TCP/IP, OSI model, subnetting, network security fundamentals), the base for later traffic-analysis and intrusion-detection work.

PROJECTS

Orchestration Security Center — Final-Year Project (Team Leader & DevOps Lead) HITU, 2025–2026

- Led an 11-member team building an AI-driven DAST platform for SMEs on a multi-agent, microservices architecture with a React dashboard.
- Owned DevOps: one-command deployment with a tiered profile system, a Caddy reverse proxy, container resource limits, and a CI/CD pipeline.

Network Intrusion Detection System (IDS) Optimization Independent Project

- Built Python ML models that classify network traffic and flag anomalies for triage, improving on signature-based detection.

Phishing Email Detector Independent Project

- Built a Python ML classifier that scores email features to separate phishing from legitimate mail.

EDUCATION

Helwan International Technology University (HITU) — B.Sc. Cybersecurity Cairo, Egypt
Graduated: 2026 | Academic Standing: Very Good

Languages: Arabic — Native • English — Professional working proficiency (technical reading & writing)
