

# OMAR ABDELAZIZ KAPIL

Cairo, Egypt | 01009774927 | omarkapil012@gmail.com | [linkedin](#)

## PROFESSIONAL SUMMARY

Highly motivated and results-driven **Cybersecurity** student with a strong dual foundation in **Cloud (AWS)** and **Network**. Proven ability to leverage technical tools like **Nmap** and **Wireshark** to implement and audit secure systems. Seeking a challenging training or entry-level role to apply expertise in **Cloud** and advanced threat intelligence using **Python**.

## TECHNICAL SKILLS

- **Cybersecurity Tools**  
Linux, Nmap, Wireshark, Metasploit, Burp Suite, Ethical Hacking, Information Security.
- **Cloud**  
AWS, EC2, S3, Docker.
- **Programming & OS**  
Python, YAML, Linux/Windows, Operating Systems.
- **Networking**  
IP Networking, Network Systems, Routing, Switching, Protocols, SSH.
- **Soft Skills**  
Teamwork, Problem Solving, Analytical Skills, Project Management, Communication, and Research Skills.

## EDUCATION

Helwan International Technology University (HITU) | (Cairo, Egypt)  
**Bachelor of Science in Cybersecurity** | Expected Graduation: 2026  
**Academic Standing:** Very Good Degree

## EXPERIENCE & TRAINING

### NTI Cloud Architecture Trainee

National Telecommunication Institute (NTI) | (Cairo, Egypt, Remote)  
August 2025 – Present

- **Completed a comprehensive 120-hour Cloud Architect training course** (final score of 87.5%), demonstrating strong foundational skills in secure cloud design and deployment.
- **Focused on key AWS services**, including **IAM** (for access control and security), **CloudFormation** (for infrastructure automation), and **Elastic Beanstalk** for scalable application hosting.
- Developed expertise in **Cloud-Native Architecture** and **Cloud Security** best practices, preparing to contribute to secure deployments.

## Computer Networking Training

Information Technology Institute (ITI) |

(Cairo, Egypt)

April 2023 – May 2023

- Completed intensive coursework covering **network fundamentals** and **Cybersecurity essentials**, building a strong base for threat mitigation.
- Established proficiency in **Network Security** principles and **IP Networking** concepts, crucial for securing network boundaries.

## Tech Internship Academy (DevOps)

STEM EC! | March 2024

- Participated in a DevOps internship, gaining exposure to **CI/CD** pipelines and basic automation, providing context for secure and rapid deployment within cloud environments.

## SELECTED CYBERSECURITY PROJECTS

### Network Intrusion Detection System (IDS) Optimization

*Independent Project*

- **Designed and implemented** an **Optimized Machine Learning Approach** to enhance Network Intrusion Detection Systems (IDS).
- **Developed Python-based models** to analyze network traffic patterns, **significantly improving the detection accuracy** of malicious activities compared to traditional methods.

### Phishing Email Detector

*Independent Project*

- **Created a ML Based detector** for identifying and filtering phishing emails.
- **Leveraged ML libraries in Python** to process email features and classify potential threats, contributing to basic threat intelligence.

### Security Tool Proficiency

*Independent Practice*

- Gained hands-on expertise in industry-standard security tools, including **Nmap** for network mapping, **Wireshark** for packet analysis, and **Metasploit** for penetration testing simulations.
- Practiced **reverse engineering** and **malware analysis** techniques through self-study and practical exercises.

## Languages

**Arabic** (Native), **English** (B2).
